## Vintage report

The 2023 wine year in Rheinhessen began with mild temperatures, which were crucial for a successful flowering in early June. With temperatures of up to 30 degrees during the harvest, grapes were harvested in the early hours of the morning while they were still fresh and cool. Good cooling technology was crucial for good quality management. Late-ripening varieties such as Riesling then benefited from the late summer temperatures during the day and the cool temperatures at night.
