Vintage report

Whereas the first half of the year was characterized by drought and warm weather, the second half brought a lot of rainfall. At the end of June, it promised to become a very early vintage. Harvest started on 12th of September and ended on October the 16th. The high humidity made Botrytis spread. Luckily this only harmed the quantity and not the quality. Due to the positive Botrytis Salm were able to pick great grapes for a Beerenauslese. The grapes were highly aromatic. The freshly pressed juice showed a vibrant acidity and was very intense in taste.
